# 賞星賞月賀中秋

# Mid-Autumn with Stars and Moon

愛以專屬器材觀測欣賞月亮的「另一面」,探索太空 的奥秘。

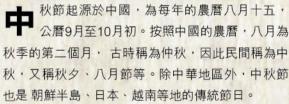

月球表面上有可用肉眼清楚看見的黑暗的地 方,稱之為月海,所以稱之為月海是因為古代的天 文學家認為這些地方充滿了水。經研究後,始發現 那些黑暗部分乃是古代火山爆發後熔岩漿在窪地凝 結成的廣大玄武岩。此外,月球表面亦有不少撞擊 坑,乃由小行星或彗星撞擊月球表面形成,現在估 計單在月球正面直徑大於1公里的隕石坑就大約有 300.000個。

以下為與月亮相關的幾個天文現象:

月蝕為主要的月相天文現象。當月蝕發生時、

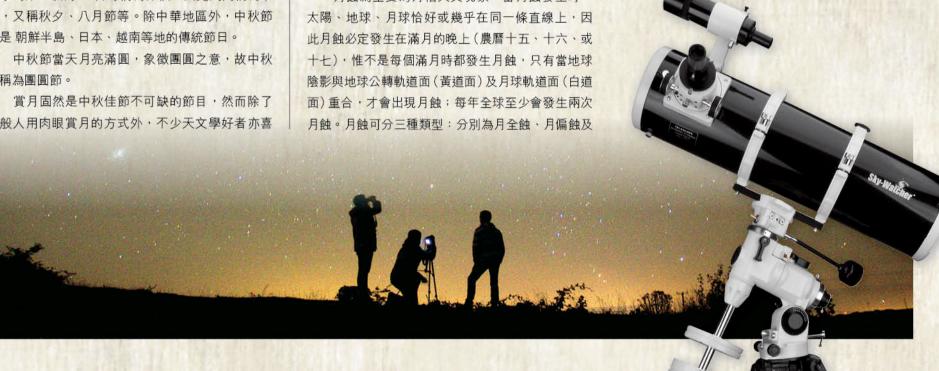

半影月蝕。由於地球的本影比月球大得多、故發生月 全蝕時,月球會完全進入地球的本影區內,所以並不 會出現月環蝕這種現象。相比於日蝕,月蝕發生的時 間(月球由進入至走出地影)是十分 長的,平均需時 數小時。月全蝕時間最長可長達1小時45分,日全蝕 最長僅長達7分31秒。

除了觀月,星象當然也是天文愛好者不會放 過的天文現象。觀星初學者第一步是認識星座,當 認識一些星座後・你便可更易找出一些有趣天體觀 測。全天共有88星座,在北半球可見到大部分,有

又稱為團圓節。

一般人用肉眼賞月的方式外,不少天文學好者亦喜

小部份則只能在南半球看見。認識星座不用借助任何儀器,只需利用肉眼便可,星座一般都橫誇天空15度以上,肉眼所謂是最闊角度的觀測工具,雙筒鏡有時亦未能涵蓋整個星座。認識星座只需借助星圖,再多一枝紅光電筒及指南針以分辨南北。

倘進一步利用雙筒鏡,或輕便天文望 遠鏡搜尋星座裹的不同組合形態的天體,更 可擴大你的眼界,親眼體會奇異的宇宙。要 體會觀測星象的樂趣,就由中秋節賞月開始 吧!

id-Autumn festival was originated in China, on 15th August of the Lunar calendar and normally in early September or October of the western calendar. Since August in Lunar calendar is the second month of Autumn, so people called the festival "middle Autumn" in ancient time and "Mid-Autumn", "Autumn Eve" or "August Fest" nowadays.

Except China, mid-autumn festival is also a traditional festival in Korea, Japan and Vietnam. Because of the symbolic meaning of reunion, so the festival is also called "Reunion Day".

Enjoying the full moon is a must during Mid-Autumn Festival. On the other hand, the fans of astronomy will explore "the other side" of the moon with professional equipments as well as the mystery of the outer spece.

The dark area of the moon visible to our naked eyes is called "lunar mare". The reason is that the ancient astronomers thought that the area was full of water. Later investigation found that it was the basalt from condensed lava on the endocrator after the volcanic explosion. Moreover, there are many puddles on the surface of the moon striked by minor planets or comet. A

guess made for the number of meteoritic puddle is about 300,000, each of whose diameter is larger than one kilometre.

Several astronomical phenomena related to the moon are as follow:

Lunar eclipse is the main phenomenon of moon phase. During lunar eclipse, the sun, the earth and the moon locate about 180° apart from each other, so it can only occur dunring full moon (i.e. 15th, 16th or 17th of Lunar month) and when the shadow of the earth overlaps with ecliptic piston and Lunar orbit. There are two lunar eclipses in the World every year. There are three kinds of lunar eclipse: the total lunar eclipse, the partial lunar eclipse and the penumbral luanr eclipse. Because the sun's umbra is larger, so the moon completely enters the Earth's umbra during total lunar eclipse, and "annular lunar eclipse" is not going to happen. Lunar eclipse (from entering to leaving the umbra) takes a much longer time than solar eclipse. Usually it takes one hour and forty-five minutes for total lunar eclipse and seven minutes and thirty-one second for solar eclipse.

Apart from the moon, stars are also phenomena that the fans will not miss. To understand the horoscope is the first step for the beginners. Afterward, you will find out some interesting phenomena.

There are eighty-eight horoscopes in total. Most of them appear in the North and small proportion of them in the South. We can understand the horoscope without the assistance of any equipment but our eyes. Horoscope in general across the sky for fifteen degrees, which even niscope cannot cover such a wide area. What we need are the star chart, red light torch and a compass.

Further use of niscope or celestron to look up to differeent styles of horoscopes and the universe can widen your horizons. Start from enjoying the moon in Autumn.

Summer: Sagittàrius, Scorpio, Cygnus, Bootes

Autumn: Pegasus, Cassiopeia, Cassiopeia

Winter: Orion, Canis Major, Taurus, Auriga

# 揀選雙筒鏡 小貼士:

雙筒鏡有 很多格規, 主要是口徑

上分別·不同 產地價錢也有很

大差異,觀星愛好者最常用的格 規是10×50和10×60,小朋友則可

選擇8×40較輕便的款式。雙筒鏡上印上的格規,例如 10×50,第一數字表示10倍,第二數字表示口徑50毫米 (50mm)。

### Tips for purchasing Niscope:

There are various standards for niscope, mainly focus on the size of the gauge and the prices based on the place of origin. The most popular standards are 10x50 and 10x60. For children, 8x40 is considered more handy. The standard marked on the niscope, such as 10x50, the first number means 10 times while the second means the gauge is 50mm.

# 會員事務發展小組委員專題訪問 金匯盛實業有限公司 劉雅君 勇於開創 追求卓越

Interview with Members' Affairs Development Committee members Ms. Landy Lau, AL Goodwell Industries Ltd
To Innovate For Excellence

場競爭激烈,企業要突圍而出,必須勇於創新, 時刻為客戶提供高質素的產品和服務。今期訪問的對象劉雅君小姐,成立金匯盛實業有限公司近30 年,就是憑著時刻走在市場尖端的理念,旨於為客人帶來創新的產品,在市場多年仍屹立不倒。

金匯盛實業有限公司於1986年成立,初期為代理 半導體零件的貿易公司,經營香港及國內進出口業務, 至1989年,開始兼營生產項目,於90年代,劉氏首於 大陸設廠,生產喇叭、耳機、接收器、集成電路等, 外銷北美、東歐、巴西、土耳奇等地,於1998已取得 ISO9002國際質量保證體系認證。

說起經營理念,劉氏深信創新才能留住客人,故特別於深圳開設研究所,成立專業的研發團隊,以時刻與市場同步,把最新的技術用於產品上。「我們重視多元化的發展,不斷成立新的產品線,照顧及配合客戶的需要,為他們帶來更多的選擇及彈性。此外,我們亦會儘量減除不必要的生產成本,搜購最合適的原材料,務求為客人以最低的成本做到最高的質素的產品!企業本身亦必須做好品質管理的工作,嚴格執行質量檢驗程序,以確保產品保持國際質量標準水平。」至今,劉氏於內地不同省份設有5家工廠,員工人數達8000人。

此外,劉氏表示人才是企業發展十分重要的一環,樂於吸納不同方面的優才,為公司注入新動力。説

到未來發展,Landy表示除會進一步拓展生產設備,並開拓更多新興市場,如俄羅斯、波蘭及南美地區等。

劉氏加入廠商會多年,於本年更加入成為會員事務發展小組成員之一,劉氏表示廠商會給予會員十分親切的感覺,更推出入會達10年升格成為永遠會員可享有優惠的措施,此舉可讓會員帶來歸屬感。未來,劉氏建議會方可多行一步,擔當聯系的角色,利用廠商會廣濶的工商網絡,發掘及考察內地投資熱點,早著先機,為會員帶來更多的得益。

owadays, to breakout in the industry, enterprises have to rack their brains out to innovate and provide products with high quality. Ms. Landy Lau, who always clings the tidal current of innovative products, has given the reason why her company can stand still for nearly thirty years in the competitive market.

Founded in 1986, AL Goodwell Industries Limited was initially an agency of semiconductor providing import / export trade services to mainland China. In 1989, the company started their production business and established their first factory in mainland China in the next year. Products exporting to North America, Eastern Europe, Basil and Turkey and elsewhere included speakers, earphones, receivers and integrated circuits. ISO9002 was awarded to the company in 1998.

For the management philosophy, Lau believes that the only way to build trust with customers is innovation. It has explained the existence of their research centre in Shenzhen with a team of research experts. In order to keep the pace with the market, the research team applies the latest techniques to their products.

"We stress diversified development, thus we keep set up new product lines to satisfy our customers so that they can have more option and flexibility. Also, we cut the unnecessary cost by purchasing the best materials to provide our customers the best products in reasonable prices. Strict quality control to meet the national requirement is our responsibility as an enterprise." Now, Lau possesses five factories in various provinces with around 8000 employees.

In addition, Lau pointed out the importance of genius in enterprise development, which injects dynamic for the company. Beside the further expansion of production facilities, Lau indicated that the exploration of new markets, such as Russia, Poland and South America district is also part of the future development of the company.

Lau has been in CMA for years and become a member of Members' Affairs Development Committee this year. Lau said that CMA provides members nice atmosphere. The initiative of upgrading to permanent member to those who have joined CMA for ten years brings the members' sense of belongings. Lau suggested CMA playing the role of connection, exploring investment spots in mainland China with the wide business network of CMA so that all members can be benefited.

# 宋代瓷器藝術淺覽

# A brief overview of porcelain and ceramic art from the Song Dynasty

\_ 代陶瓷其實是一種集大成者的藝 人文等眾多元素,是一個時代的文化藝術特色的總 體體現·宋代瓷器代表中國最傳統的美學高峰·並 將陶瓷藝術昇華到了一種哲學的境界。

宋代五大名窯眾所共知:汝、官、哥、鈞、 定。有關傳世的作品極為稀少,在中國陶瓷史上佔 據著重要的地位,以汝窯為例,現今在各大國家級 博物館和小數已知收藏家手上有記錄的只有67件 傳世品,而非官方統計也不足百件傳世。蘇富比二 〇一二拍賣會上,一汝窯以2.0786億港元天價成 交,其市場價值不言而喻,可見五大名窯收藏潛力 無限。

汝窯、官窯、哥窯都具有開片之美 (開片是燒 造成功的釉面上往往開有細碎繁密的紋片,宛如魚 鱗或冰裂狀,學界稱其為「開片」);汝窯其氣度 雍容、溫潤如玉, 釉色雅淨, 華而不艷為歷代帝王 所追捧; 哥窯的典型特徵「金絲鐵線」, 鈞窯的多 彩絕色: 定窯之靜的溫潤白色各具魅力, 神為之 奪,都為中國陶瓷史留下了一筆。

然而·古董市場上充斥魚目混珠的膺品·愛 好者如欲購買收藏或投資·建議與具備相關專業知 識的人士交流,以防受騙。

ncient ceramic is Aactually an art that encompasses a number of different elements including politics, social, economics, technology and humanities. It gives a holistic picture of the cultural and artistic characteristics of a particular era. Porcelain from the Song Dynasty represents the peak of the most traditional form of aesthetics in China, and has also brought ceramic art to a form of philosophical realm.

The 5 porcelain kilns of the Song Dynasty are well known to the public - Ru, Guan, Jun, Ge and Ding. Artworks that came from or related to these kilns are extremely rare and therefore they occupy an important position in the history of ceramics. Take the Ru kiln as an example, only 67 of its artworks have been handed down based on the record from the various national

museums and a few collectors known to have them in possession. Unofficial statistics also indicates there are

less than a hundred pieces of them still in existence today. In a 2012 Sotherby's auction, one Ru kiln was bought for a massive HK\$207.86m, once again proving its value in the market. It is

therefore not difficult to see the potential in collecting items from these 5 porcelain kilns.

The Ru kiln, Guan kiln and Ge kiln all possess the beauty of "Kaipian" ("Kaipian" is a term used amongst academicians to describe the tiny but densely positioned crackles, similar to fish scale or the pattern of an ice cracks, found on the surface of successfully glazed porcelain). The Ru kiln brings real elegance and is warm and smooth as jade. It has a clean colored glaze and is grand yet never gaudy. All these reasons made the Ru kiln a much sought after artwork by generations of emperors. The Ge kiln is typically characterized by its "golden" irregular crackles on its glaze, while the Jun kiln offers stunning colors as its ceramic is glazed in multiple colors. The Ding kilns are famous for their "calm" off-white glazes. Each of these kilns has its own charm and distinct features capable of stealing people's minds. They have without doubt made up an important part of Chinese ceramic and porcelain

Unfortunately counterfeits claiming to be real can be commonly found in the antique's market. If art lovers are interested to purchase these artworks for collection or as investments, it is recommended that they should speak with people with the relevant expertise and knowledge to avoid being lied to.

# 外展衝勁樂2014

# Outward Bound Corporate Challenge 2014

丁丁 勁樂」2014由香港外展訓練學校主辦,將於本年十二月二十八日(星期日)於中文大學 夏鼎基運動場舉行。是次比賽希望讓參加的企業隊 伍提升團隊精神,同時亦為香港外展訓練學校籌集 資金。籌得的善款將用作提供高質素「戶外體驗式教學」給有需要人士及機構如癌病康復者、被虐婦女、 邊緣少年、機會再生計劃、突破行動等等。

自1986開始,「衝勁樂」一直深受各機構的支持。去年參加的人數超過六百人,五十三隊來自各著名機構的勁旅,進行了八項鬥智鬥力、講求合作性的外展競技賽,並籌得超過港幣一百零八萬。今年我們希望能邀得六十隊參與是次盛會,籌款目標為一百二十萬。每隊參加的費用為港幣\$18,000,9月12日前報名會減收\$2,000。參賽者十名,另加一名隊長;於四個不同組別爭取獎項及榮耀。報名截止日期為10月10日(星期五)。如有任何問題,請致電與香港外展訓練學校籌款部聯絡。

The Corporate Challenge 2014 is hosted by Outward Bound Hong Kong, it will be held on 28 December (Sunday) at the Sir Philip Haddon-Cave Sports Field in The Chinese University of Hong Kong. The event gathers

teams from Hong Kong's leading organisations to compete in 8 challenges especially designed to demand communication skills, creative thinking, teamwork, problem-solving and physical strength. The event also provides a perfect platform for your employees to enjoy some healthy competition and a sense of unity and team spirit while interacting with people from different organisations. Proceeds were added to our Bursary Fund which is used to allow deserving applicants to participate in our Community Based courses. These courses help survivors of cancer, abused women, graduates from prison, the physically impaired and youth at risk to experience the benefits of an Outward Bound course, helping them become confident and motivated individuals.

Since 1986, the Corporate Challenge has consistently received positive feedback from participating organizations. Last year the event saw a record of 53 teams enter the competition and raised an impressive HK\$1,084,000. We very much hope you will join us this year which promises to be bigger and better than ever. Our goal this year is

to have 60 teams enter the challenge and raise HK\$1.2 million in funds. The application fee for the Corporate Challenge is HK\$18,000 per team of 11 people including a team captain. Registration before 12 Sep is entitled

to a discount of HK\$2,000. Trophies can be won across four different categories. You may also choose to sponsor a young adult or a charitable organisation to participate in the event, and we can help line one up for you if you have not already selected one. The deadline for the enrolment is 10 October (Friday). Should you have any enquiries, please feel free to contact OBHK fundraising office.

# 「自願參與用水效益標籤計劃」

# Voluntary Water Efficiency Labelling Scheme

▼ 少人於購買冷氣機、洗衣機、抽濕機等電器 時,也會參看「能源效益標籤」,以選購具能源 效益的家電用品,原來,政府早年亦推出「自願參與用 水效益標籤計劃」,參與計劃的各類水務裝置和用水器 具產品會貼上用水效益標籤·向消費者説明其耗水量 及用水效益,方便消費者作出選擇。

現時標籤計劃涵蓋的產品包括沐浴花灑、水龍 頭、洗衣機、小便器用具及最新納入計劃的節流器。 用水效益標籤顯示有關產品的用水級別,1滴水滴為第 一級,最高4級,第1級最節省用水,第4級則為最不節 省用水,簡單易明,消費者可於選購產品時參閱標籤 説明,做個節約用水的精明消費者!更多相關資料可 瀏覽www.wsd.gov.hk。

eople tend to refer the Energy Efficiency Label when purchasing air-conditioner, washing machine, dehumidifier, etc. In fact, the Government also introduced the Voluntary Water Efficiency Labelling Scheme in early years. There is a water efficieny label on the water consuming appliances under the scheme to help consumers choose water efficient products.

The products covered under the scheme include showers for bathing, water taps, washing machine, urinal equipments and flow controllers. For the level of water consumption, one water drop means level one, which is considerd consuming the least water consumption. Level four is the highest level, which means consuming the most water. Consumers may refer to the label when purchasing the relevant appliances. For more information, please visit http://www.wsd.gov.hk.

# 巧用海綿養盆栽

Take care of plots with sponge

■ 次冷知識就告訴你一個利用廢舊海綿養好 走 小盆栽的妙招。先把海綿用水浸濕,然後 把海綿放到盆栽的小託盤裡·上面撒上適量的 土·再把盆栽放在鋪了土的海綿上·這樣小盆栽 在缺水的時候就會自然吸收海綿中的水分:

> 而在水分充足的時候,又會由於濃度的差 異,保持土壤中水分的平衡,起到自我 調節的作用了。在澆花時海綿也可以起 到蓄水的作用,能較長時間地供給花木

his trivia tells you how to take good care of plots with sponge.

First, wet the sponge. Put it on the tray under the plot with some plotting soil on it. Then locate the plot on the sponge. The sponge helps store the water and provide the plot whenever necessary. It can also adjust the moisture of the soil based on the difference of the density. When watering the plots, the sponge is able to store the water and provide to the plants whenever necessary.

新福特Fiesta正式抵港,並引入屢獲殊榮的 1.0公升EcoBoost動力系統,勢將再次為香港 的小型轎車市場奠下全新基準。

福特五門掀背Fiesta裝配1.0公升EcoBoost 三缸引擎,擁有強勁動力、扭力以及優化功能, EcoBoost技術結合燃油直噴、渦輪增壓與可變氣門 正時技術於一身,令此精簡引擎媲美傳統1.6升引擎 的動力與性能,同時具備領先燃油效益以及排放水 平。EcoBoost三缸引擎節省25%的運動部件,締造 出22.2km/L的出眾燃油效益,並符合歐盟五期排放 標準。此外,福特Select Shift技術透過波棍上的按 扭作手動變速,進一步提升表現。 全新Fiesta1.0 EcoBoost配備多種安全及智能裝置,包括:電子穩定程式(Electronic Stability Program)及循跡控制系統(Traction Control System),可輔助駕駛者時刻保持對車輛的全面操控,特別於濕滑路

面之上;另車款亦設有防鎖剎車系統(Anti-lock Braking System)、電子剎車力分配系統(Electronic Brake Force Distribution)、緊急煞車輔助系統(Emergency Brake Assist)、福特SYNC™聲控系統以及倒車感應。車款備有11種眩目色彩以供選擇。

The sporty Ford Fiesta is set to again redefine the compact car segment in Hong Kong with the highly-anticipated arrival of the award-winning 1.0L EcoBoost powertrain.

Ford's patented three-cylinder 1.0L EcoBoost engine is big on power, torque and refinement.

EcoBoost technology combines direct fuel injection, turbocharging and variable valve timing that enable this downsized engine to deliver the power and performance of a conventional 1.6L engine with class-leading fuel efficiency and emissions levels. With 25 percent fewer moving parts, the three-cylinder EcoBoost delivers both class-leading fuel efficiency of 22.2km/L and emissions of Euro V standard. Additionally, Select Shift Technology

further enhances performance by allowing manual gear changes via a swift knob switch.

Key safety and smart features available in the new Fiesta 1.0L EcoBoost include Electronic Stability Program (ESP) with Traction Control System (TCS) helping customers remain in control of the car at all times, especially on slippery roads, Anti-Lock Braking System (ABS) with Electronic Brake Force Distribution (EBD), Emergency Brake Assist (EBA), Voice-activated Ford SYNC system and Rear Parking Sensor. 11 striking colours are available for the new Fiesta 1.0L EcoBoost.

### 規格 SPECIFICATIONS

引擎 Engine: Three-cylinder 1.0L EcoBoost engine

最大馬力Max Output: 100PS/6,000rpm

最大扭力 Max Torque: 170Nm/1,400-4,000rpm
